Healthy marine species like whales, sea turtles, coral, and salmon are important for maintaining balanced and thriving ocean ecosystems. We work to prevent marine species populations from decline and extinction, protect them from human activities, and monitor activities that might impact them so they are around for future generations.

Hawaiian monk seals are the only true seals to be found year-round in tropical waters . After the annual moult, this monk seal is a silvery grey colour on the back, with cream colouring on the throat, chest and underside . Over time the coat looks brown above and yellow below; males, and some females, turn almost black with age . Certain ...
