component development for the java platform | Download

A web database application was developed using Oracle8i with the Java and XML components. The purpose was to test whether these different technologies can work together to build a simple business application and

bring it to the web using the Oracle built in Java technology, and to have its data displayed dynamically using the Extensible Markup Language technology. Problems were found when ...

Angela K. W. Hon. Oracle8i with Java/XML â€œ Does It Work? A

Oracle8i introduces additional support for Javaâ„¢ â€œ todayâ€™s most popular and productive programming language by including a robust, integrated, and scalable Java VM within the server. This expands Oracleâ€™s support for Java into all tiers of applications, allowing Java programs to be deployed where they perform best, either in the client, server, or middle tier without recompiling or ...
