This report examines what a place-based approach to population health might look like in a city context. Drawing on international examples, we explore the range of roles that city governments can play in improving population health and the underlying conditions needed for effective urban health governance.

The role of cities in improving population health

A health care worker in Bangladesh gives a young pregnant woman a birthing kit for a safer delivery. It contains a sterile razor to cut the cord, a sterile plastic sheet to place under the birth area, and other simple, sanitary items - all which help save lives.
