Glucocorticoids such as cortisol affect carbohydrate, fat, and protein metabolism, and have anti-inflammatory, immunosuppressive, anti-proliferative, and vasoconstrictive effects. Anti-inflammatory effects are mediated by blocking the action of inflammatory mediators (transrepression) and inducing anti-inflammatory mediators (transactivation). ...

**An Introduction to Elevated Temperature in HPLC**

Preparation of aqueous mobile phase is the most critical step in reversed-phase chromatography (RPC) method development for ionic analytes. This includes consideration of the effects of pH on analyte retention, type of buffer to use, and its concentration, solubility in the organic modifier and its effect on detection, among other considerations.
