A critique of the development of quantitative

Quantitative methods have been an integral part of human geography since the quantitative revolution of the 1950s. Quantitative methods in the early 21st century are vastly more sophisticated than their earlier counterparts. Since the early 1990s, in particular, the interest in georeferenced data and the need to understand it have led to an enormous field of spatial analysis. By the late 1990s ...
